

## Assignment -2

Assignment Date	27 September 2022
Student Name	Praveenkumar M
Student Roll Number	620119104073
Maximum Marks	2 Marks

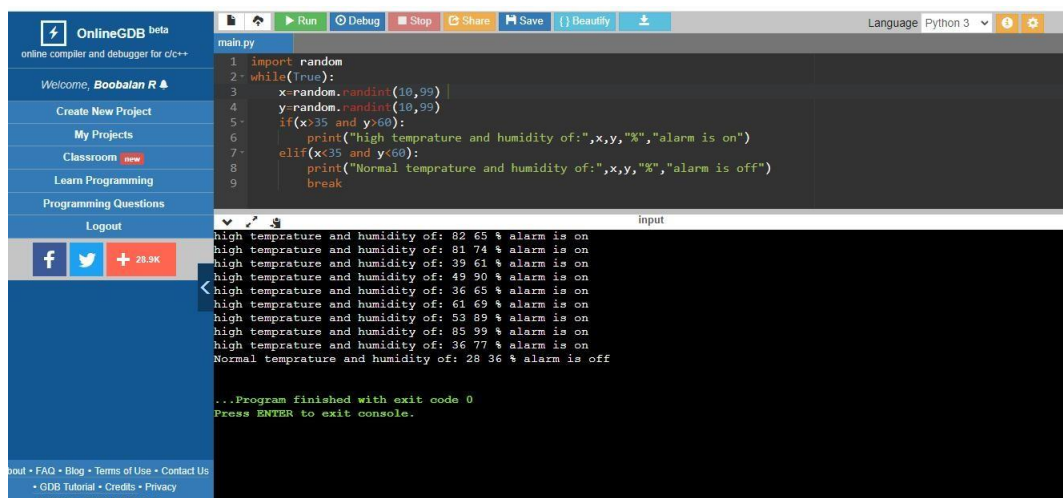

### Question:

Build a python code, assume you get temperature and humidity values (generated with random function to a variable) and write a condition to continuously detect alarm in case of high temperature.

### Code:

```
import random
while(True):
    x=random.randint(10,99)
    y=random.randint(10,99)
    if(x>35 and y>60):
        print("high temprature and humidity of:",x,y,"%","alarm is on")
    elif(x<35 and y<60):
        print("Normal temprature and humidity of:",x,y,"%","alarm is off")
    Break
```

### Output:

```
main.py
1 import random
2 while(True):
3     x=random.randint(10,99)
4     y=random.randint(10,99)
5     if(x>35 and y>60):
6         print("high temprature and humidity of:",x,y,"%","alarm is on")
7     elif(x<35 and y<60):
8         print("Normal temprature and humidity of:",x,y,"%","alarm is off")
9     break

high temprature and humidity of: 82 65 % alarm is on
high temprature and humidity of: 81 74 % alarm is on
high temprature and humidity of: 39 61 % alarm is on
high temprature and humidity of: 49 90 % alarm is on
high temprature and humidity of: 36 65 % alarm is on
high temprature and humidity of: 61 69 % alarm is on
high temprature and humidity of: 53 89 % alarm is on
high temprature and humidity of: 85 99 % alarm is on
high temprature and humidity of: 36 77 % alarm is on
Normal temprature and humidity of: 28 36 % alarm is off
